

PEDIATRIC TRANSPORT

PEDIATRIC SPINE BOARD

A dual purpose spine board in one module

In the world of emergency care, it is of great importance to optimize stocking spaces and to satisfy all requests for ergonomically advanced rescue equipment. Optimizing space and performance is one of the main features of the **Adult and Pediatric Spine Board**.

A new design that brings together solidity, dynamics, space and performance and at the same time sets a new standard for high-performance spine boards. Great performance and above all, great for its attention towards the patient; adults and child.

An exclusive idea that allows two different profiles with one single product, reducing costs and stock volume. A pediatric and adult spine board always ready to collaborate together and each enhancing the other.

FEATURES

- Seamless design prevents fluids from entering and eliminates cross-contamination
- Spinal injury can be diagnosed without moving the patient from the spine board
- Compatible to all head immobilization devices
- An exclusive idea that allows two different profiles with one single product, reducing costs and stock volume

SPECIFICATION
