

PATIENT RESCUE

### HERO EMERGENCY KITS

Designed to save lives, intended for areas with large footfall

Designed for use in high risk environments these kits have been created by experts in the field of medicine, first aid and counter terrorism policing.

**Hero Emergency Kits** are designed to save lives and are intended to be kept in public places, such as arenas, football stadiums, railway stations and areas with a large footfall.

**Hero Emergency Kits** are designed for use in traumatic emergencies such as stabbings, road traffic collisions, falls and tragically sometimes, terror attacks.

The kits contain military-grade wound dressings, tourniquets, plus other vital components and have clear written and visual instructions which make them easy for anyone to use, regardless of their level of training.
