

PATIENT HANDLING

SMART COT

An intelligent fixing system that transforms a Stryker ambulance cot into a medical treatment centre

SmartCot is an innovative, plug-and-play intelligent fixing system that transforms a standard Stryker ambulance cot into a mobile medical treatment centre in seconds. Designed for emergency and clinical environments, **SmartCot** allows paramedics to attach critical medical equipment securely and efficiently, revolutionising on-scene and in-transit patient care.

Whether enabling basic EMS functions or supporting full-scale ICU and neonatal transport systems, **SmartCot** offers scalable and professional mounting solutions through modular components like **SmartCot Connect**, **Frontline**, **Pro**, **ITU**, **Interface**, and **Neo**. With **SmartCot**, emergency teams can quickly adapt to evolving clinical needs while improving patient outcomes.

PRODUCT FEATURES

- Instantly transforms cot into treatment centre
- Plug-and-play intelligent fixing
- Rapid deployment in seconds
- Supports defibrillators, IVs, monitors, ventilators
- Integrates syringe drivers and infusion pumps
- Works with Stryker Power-PRO accessories
- SmartCot Connect base for all models
- Scalable system from Frontline to ICU
- Platform for securing medical devices
- Neonatal-ready (SmartCot Neo with incubator support)
- Independent hospital mobility via retractable wheels
- Supports intensive care transport (SmartCot ITU)
- Seamless device integration across care levels
- Durable construction
